## Nonsense Word Use

40L volunteers have found nonsense words very helpful for their remedial students. They help the brain retrain the guessing habits acquired from sight word teaching. Nonsense words are also useful for beginning readers to check to see if they are truly understanding the phonics they are being taught. They are also an efficient way to work on specific types of nonsense words.

Students who improved their reading speed and accuracy of nonsense words improved their reading grade level and oral reading speed. Read a group of 25 words (5 rows) and track accuracy and Words Per Minute (WPM) read, using 40L's nonsense word tracking sheet to calculate and record WPM rates.

There are follow on words to use for students reading the words with errors or reading them below 50 WPM for a 1<sup>st</sup> grade student, below 70 wpm for grade 2, below 80 WPM for grades 3 - 4, below 90 WPM for grades 5 – 8, and below 100 WPM for high school students or adults. The additional words are available at 40L's Syllables Spell Success page.

Students who are reading below these WPM rates or who make errors may need to practice the basic sounds with the charts and/or do some phonogram drills. Focus on accuracy, not speed. Speed will come with accurate practice over time.

Students with dyslexia, however, may never achieve these speeds and may need an Orton-Gillingham (OG) phonics program to improve. See 40L's dyslexia page for more information if you suspect dyslexia.<sup>1</sup>

40L volunteers hope that these nonsense words help you become a better reader as you retrain your brain with phonics.
